To whom it may concern:

Emily Zhang was employed at DCI Engineers between 2006 until December 2009 as a structural CAD designer using the latest versions of AutoCAD. Emily worked on various commercial, industrial and residential projects involving detailing of masonry, steel, timber, and concrete structures including South Puyallup's Sunrise Village, 500,000 square feet of retail space and winner of NAIOP's Washington State Chapter's "Retail Development of the Year" Award.

Emily is a smart structural CAD designer; she is thorough in thinking through the coordination of plans and details. She has demonstrated good cognitive ability to assist in development of accurate structural details with minimum direction from the engineers. She was considered an efficient worker, and is a top tier CAD designer. Emily has a great attitude toward her work, her employer, and those she worked with. Emily worked well as part of a team on large projects and also independently on smaller tasks.

I recommend Emily Zhang for employment with your company. Her positive attitude will be an asset for any firm, and she will be well liked by your employees as she was here. If you have any further questions, please do not hesitate to call me at the phone number below.
